Summary

Java Backend Developer with 4.6+ years of experience building scalable Java 8/11 and Spring enterprise services, REST/SOAP APIs, microservices, SOA, and cloud integrations across healthcare and automotive domains. Delivered systems processing 50K+ daily requests at 99.99% SLA and improved production performance approximately 90% through Oracle SQL tuning and legacy Java modernization. Hands-on with AWS/Azure, messaging, CI/CD, unit testing, API security, production troubleshooting, and observability.

Work Experience

NTT Data, Bengaluru, India

Software Developer, Aug 2022 - Aug 2024

- Engineered SOA-based Java services and REST/SOAP APIs using Java 8/11, Spring Framework, IBM WebSphere, CAQH v2/v4 standards, and API Gateway certificate-based authentication, sustaining 50K+ daily requests and 99.99% SLA availability.
- Designed event-driven hybrid-cloud integration using Azure Relay, Azure Service Bus, Azure Functions, and Java Message Service (JMS) queues to automate downstream database propagation across DEV, SIT, and PROD environments.
- Led Maven, Jenkins, Azure DevOps, IBM UrbanCode Deploy, Git/SVN, JUnit unit testing, and CI/CD delivery; migrated services to Log4j 2.x, reduced issue-resolution time 20%, and accelerated an EDX platform upgrade 50% through dependency modernization, production support, and root-cause debugging.

Capgemini, Mumbai, India

Senior Analyst / Analyst, Jul 2020 - Aug 2022

- Developed enterprise automotive applications using Java 8, Spring MVC, J2EE, Enterprise JavaBeans (EJB), JSF, RESTful APIs, JDBC, Oracle SQL, and microservices patterns for high-volume transactional workflows with greater than 99% uptime.
- Implemented a vehicle-configuration module integrating a Python decision-tree service through REST APIs to validate option availability, pricing, and business rules; improved production performance approximately 90% through SQL optimization, Oracle database tuning, query refactoring, and legacy Java modernization.
- Improved delivery consistency with Jenkins, GitLab CI/CD, Maven, Git/SVN, JUnit4 unit testing, and quality gates while mentoring junior Java developers through onboarding, pair programming, code reviews, debugging, documentation, and object-oriented design guidance.

Capgemini, Mumbai, India

Analyst Trainee, Jan 2020 - Jun 2020

- Built Java Spring Framework and Spring MVC backend modules with PostgreSQL for fitness-club and digital-wallet applications in a 30-member Agile program, implementing authentication, email/OTP login, CRUD operations, account balances, and transactions.

Technical Skills

Languages: Core Java 8/11, SQL, Python.

Java Backend: Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, JPA, J2EE, EJB, JSF, JDBC, REST APIs, SOAP APIs, Microservices, Service-Oriented Architecture (SOA), JMS, API Gateway, OAuth 2.0.

Cloud and DevOps: AWS (ECS, Lambda, RDS, S3, EFS, CloudWatch), Azure (Functions, Service Bus, Relay, DevOps), Docker, Kubernetes, Linux, Terraform, Jenkins, GitLab CI/CD, Maven, IBM UrbanCode Deploy, Git, SVN.

Databases: PostgreSQL, Oracle Database, Relational Databases (RDBMS), SQL Optimization.

Quality and Practices: JUnit/JUnit4, Unit Testing, Integration Testing, Automated Testing, SoapUI, Log4j 2.x, IBM WebSphere, Agile/Scrum, CI/CD, Object-Oriented Programming, Design Patterns, Data Structures and Algorithms, System Design, Code Reviews, Production Support, Troubleshooting, API Security, Distributed Systems, Event-Driven Architecture, Observability, Scalability, Performance Tuning.

Education

Central Michigan University, Mount Pleasant, MI, USA

Master of Science in Computer Science, Aug 2024 - Dec 2025, GPA: 3.87 / 4.0

Lovely Professional University, Punjab, India

Bachelor of Technology in Computer Science and Engineering, Aug 2016 - May 2020, CGPA: 8.02 / 10

Certifications

Microsoft Certified: Azure Fundamentals | Azure Developer Associate | Azure Data Engineer Associate
